

WP2.2 Technical Dissemination

This task concentrates mainly on supporting of a series of technical workshops, especially those focussing on the technical achievements and progress of the JRAs. The goal is

- to bring the European radio astronomy engineering results and expertise to the attention of the broader engineering community.
- to exchange of ideas and new directions,
- to attract of the interest of researchers and industrial engineers in related fields to collaborate in the development of Radio Astronomy
- to transfer knowledge in both directions.
- to foster the use of research infrastructures by industrial researchers and vice versa,
- to encourage the involvement of industrial associations in consortia or in advisory bodies.
