

WP2.1 Science Dissemination

The task focuses on supporting organization of scientific meetings, in the form of large conferences, topic-oriented smaller meetings and informal very small workshops/discussion forums. Most of those events will focus on scientific results achieved using the RadioNet facilities and/or technical developments of RadioNet activities. Additionally crossdisciplinary events will be supported every year, with the aim to feed the collaboration between radio astronomers and scientists working in other bands of the electromagnetic spectrum. This will disseminate the knowledge acquired in our field to the broader astronomical community and at the same time will broaden the scientific horizon of radio astronomers.

To avoid the duplication of work and to ensure its continuity, a **YERAC guidelines** for organisers is developed and will be regularly updated. The current version is from [17.12.2018](#).
