

## WP3.3 Training - Short Term Missions (STM)

This activity supports mobility in order to reinforce the contacts between the different groups: astronomers, engineers and industry. This will allow early career researchers to establish international, diverse collaboration. On the long perspective it will lay a foundation for the sustainability of the present and future infrastructures. The exchange programme will be open not only to the project partners but also to institutes elsewhere, especially those based in African countries will be encouraged. However, the visit must take place at the RadioNet beneficiaries.

### Supported STMs

| STM |                           |                          |                    | Visitor (STM)          |              |                                                        |                        |
