

RadioNet support for scientific events

Application form for organisers

EVENT INFORMATION	
TITLE	Young European Radio Astronomers Conference (YERAC)
PLACE	Grenoble (France) – venue not yet fixed
ORGANISER'S INSTITUTE NAME	Institut de RadioAstronomie Millimétrique (IRAM) Roberto Neri, neri@iram.fr
DATE	Aug/Sep 2020 – dates not yet fixed (3-4 days)
NO. OF PARTICIPANTS	30-40
TOTAL EVENT COST	20-30 KE
RADIO.NET SUPPORT	50%
OTHER SOURCES OF FUNDING	
REQUEST	
Short abstract of the event	The YERAC will bring together young scientists, working in European institutions, in the field of radio/mm/submm astronomy to present and discuss their research. In addition to giving every participant the opportunity to make an oral presentation, the conference will see presentations by leading researchers and observatory scientists, a tour of the IRAM labs and eventually an excursion to the NOEMA observatory.
Relevance for RadioNet	The YERAC will focus on scientific results achieved by young astronomers using the RadioNet infrastructures.
Impact on RadioNet	The YERAC meeting is aimed at providing participants the opportunity to share knowledge and interest in using and taking advantage of the RadioNet facilities, and to establish new networking collaborations with European researchers in the field of radioastronomy.
Use of the RadioNet contribution	The RadioNet contribution will mostly be used to cover part of the accommodation, subsistence and travel expenses for the YERAC participants. The welcome reception, lunches, conference dinner, excursion to the NOEMA observatory, and other costs, will be covered by IRAM. Costs are estimated to range from 20 to 30 KE depending on the number of participants (30-40) and the duration of the conference (3-4 days).
Ethics	Participants will be selected according to an overall balance of research topics, on the potential for the research presented to generate useful discussions, and on a first-come first-served basis, taking ethical considerations and geographical balance into account.
