

Von: Jacqueline Casado Iglesias <jcasado@mpifr-bonn.mpg.de>
Betreff: [RadioNet] WP2.2 Call | selection committee | final decision |
teleconference 17 July 2019, 10-10:30 CEST| minutes
Datum: 17. Juli 2019 um 14:07:04 MESZ
An: Alessandro Navarrini <navarrin@oa-cagliari.inaf.it>, Reinhard Keller
<rkeller@mpifr-bonn.mpg.de>, Michael Lindqvist
<michael.lindqvist@chalmers.se>, José Antonio López Fernández
<ja.lopez@oan.es>
Kopie: RadioNet <radionet@mpifr-bonn.mpg.de>

Participants: J. Casado Iglesias, R. Keller (WP leader), J. A. López
Fernández, A. Navarrini,

Main decisions:

- Both applications are successful and receive 7000€ funding each.
- The applicant of the *Frontiers in Radio astronomy with Innovative Engineering 2019*, 11-13 December 2019 in Kamena Vourla/GR receives this information:

The selection committee welcomes this workshop proposal and the idea of a new European radio astronomical instrument behind it, but as an EU funded project, *RadioNet is not allowed to fund LOC costs of non-RadioNet beneficiaries. Therefore, LOC costs of the University of Thessaly are not eligible. But the support of speakers that are selected following the RadioNet rules is eligible. As it was asked for support for max 5 persons, the selection committee can agree in the support of 5 speakers only.*

- As the next call will be the last one, there will be introduced the information in the call text, that the events that apply for funding have to happen latest end of September 2020

Please feel free to comment or add something, if I have missed something.

*Best regards,
Jaqueline*
